

**Mrs. Hamseswari Renganathan Principal Product Strategy Manager,
Oracle**

Mrs. Hamseswari Renganathan is a strategic technology leader with a strong background in driving digital transformation and AI innovation in quality-centric manufacturing environments. With over two decades of experience across industry leaders like Oracle, ZF Group, Nokia, and Texas Instruments, she has led impactful initiatives to drive predictive quality, autonomous decision-making, and real-time execution. She is currently focused on advancing AI-driven transformation in manufacturing operations, with a strong emphasis on deploying AI agents to enable intelligent, context-aware decision-making on the shop floor. She is certified by Nokia Bell Labs on 5G Industrial Automation Networks, holds advanced degrees in Electrical Engineering and Management.
